Type of Spectacles frames

Choosing your perfect pair of glasses should be a Fun and rewarding experience! But how can you Make your pick from all of the different types of Glasses frames out there?

Full-frame

These frames fully enclose your lenses with the material, Offering a sturdy-yet-stylish pair of glasses.

Available in all frame materials — from acetate and plastic To metal and titanium

They can help support thicker or heavier lenses. They can Also be more durable and less prone to damage than Thinner styles of glasses

Metal frame less comfortable than a plastic frame and Carries fewer medical prescriptions than plastic .

Full-frame Glasses نظارات كاملة الإطار

Semi-Rimless Frame

Semi-rimmed glasses may be incredibly convenient to Wear They provide you with a clear field of view, especially While reading, because the lower frame does not surround The lenses.

- Help accentuate the upper half of your face With the lenses being half exposed, they are more Susceptible to breakage and cracks

Rimless Frame

Rimless eyeglass Lightweight and modern, offer plenty of Style without taking over your face. With the only elements Being the temple arms, the nose bridge, and hinge s, little More delicate than other frame types, rimless frames Provide the largest field of vision and are also the most Lightweight option. Rimless glasses come in two types, the first with screws And the other without screw.
